

Prerequisite

Adobe Illustrator

This test is designed to assess your current knowledge and use of Illustrator and is an indicator of the prerequisite for the Advanced Illustrator course. These areas and more are covered in the Essentials course only. All questions must be completed and sent back before booking into the Advanced level.

1. What is the main difference between these two tools?

2. When would you use this tool?

3. What tools are known as the Transformation tools and what are the two main ways to use these transformation tools?
4. What does the term *Masking* mean and describe the process for it?
5. When two or more objects overlap and the intersecting parts become transparent, what is this called? Where is this located?
6. What is the difference between a gradient fill and a blend?
7. What is the easiest way of joining two shapes like picture 1, to look like picture 2?
